

**THE M&A “PITCH BOOK”:  
PROPOSED ACQUISITION OF HELLER FINANCIAL  
BY UNITED TECHNOLOGIES CORPORATION**

This technical note offers an example of a complete “pitch book” for use as a basis of class discussion and learning. Actual pitch books are almost never made available for public use. This presentation was prepared by a group of Darden students in April 2001 for a jury of M&A executives from United Technologies Corporation—they judged this work to be of excellent quality, among the best they had seen in any setting. A separate validation of the deal concept is given in the final exhibit, which records the announcement on July 30, 2001, by General Electric of its acquisition of Heller.

As you review this document, consider both its form and content. Why are each exhibit and section included in the document? What analytical work underpins the exhibits? What might explain the presentation format? What oral comments might one make in supporting this presentation before a group of executives? Consider the work from two standpoints:

*Presenter:* The person or team presenting a pitch book is seeking a mandate to do the deal. A corporate-development officer seeks the resources, time, and commitment of senior executives in order to initiate negotiations, due-diligence research, closing, and integration. An outside financial adviser seeks these resources, and also hopes to obtain a signed letter or contract committing the buyer to pay the adviser’s fee. Thus, from the presenter’s standpoint, a pitch book is necessarily a selling document.

*Audience:* The executives hearing the presentation may receive hundreds of such recommendations each year. Their main task is to decide quickly whether this deal concept merits further work and research. They will be impatient, and will want to get to the key ideas right away. Given the high failure rate of such recommendations, executives are bound to be a skeptical audience, looking for reasons to reject the proposal. Careful reasoning and some solid analysis will be vital to persuading this audience.

Consider how the following pitch book meets the requirements of both presenter and audience.

---

This note was prepared by Professor Robert Bruner from an original presentation by Allison Bridges, Jessica Chan, Leslie Glatz, Miguel Palacios, Christopher Stringer, and Karen Whitney. It was written as a basis for class discussion rather than to illustrate effective or ineffective handling of an administrative situation. # Term Sheet

## Purchase Price

Total Deal Size	\$4,845 million.
Implied Price per Share	\$50.00
Resulting HF Ownership of UTX	11.2%
Transaction Fees	\$16.11 million (0.10% of deal size for Investment Bank + 0.15% to legal and accounting firms and \$4 million in other fees).
Exchange Ratio	0.66
Cap	\$57.50

## Accounting Issues

Form	Purchase Accounting.
Consideration	100% Stock. UTX will issue shares for the 100% deal price and stagger the stock issue so that it can have the option to sell shares on the open market to pay HF's B Shareholders (i.e. Fuji Bank) cash for 19.9% of the deal. We assume that Fuji Bank may be interested in liquidity, and consequently prefer cash consideration over stock. The acquisition will still qualify as a section 368(a) reverse triangular merger for tax purposes.

Number of Shares to be issued 64.35 million shares.

## Tax Considerations

Section 368(a) Reverse Triangular Merger.  
This structure will allow HF to maintain its contractual relationships. Also, this structure facilitates elimination of minority interest in HF.

## Legal

### Synergy Value

It will be necessary to create a Special Purchase Vehicle to merge into HF.  
\$2.5 billion in Revenue Enhancements.  
\$0.4 billion in Cost Savings.  
(\$0.1) billion in Transaction Costs.

## Transaction Process Requirements

Termination Penalties	Cash penalty of \$145 million plus out-of-pocket expenses up to \$20 million.
Other	No Shop Clause.
Shareholder Vote	UTX and HF shareholders must approve the deal.
Closing Date	December 31, 2001.

## Social Issues

Organization Structure	HF becomes a stand-alone subsidiary of UTX.
Executives	HF top five executives will get three year contracts and sign-on bonuses.
Board Seats	Richard Almeida, HF Chair & CEO, will get a board seat.
Headquarters	Maintain both headquarters.
Name	Subsidiary will remain Heller Financial, Inc.
Reduction in Workforce	None.

## Deal Rationale

- **Heller will enable UTX to**
  - ✓ Increase sales by meeting financing needs of customers
  - ✓ Respond to the growing importance of leasing as an order-winning criteria and as a distribution channel used by OEMs to sell capital equipment\*
  - ✓ Promote the concept of “lifetime customer management” by offering financing with products, maintenance and services
  - ✓ Respond to competitors’ actions
  - ✓ Improve capital management and efficiency
  - ✓ Develop a new base of revenue growth, recurring revenue, and profit stability
  - ✓ Improve UTC’s margins\*\*

\* See Exhibit 1

\*\* See Exhibit 2

# Business Description

**Net Revenue Breakdown**  
(**\$1.04 billion in 2000**)

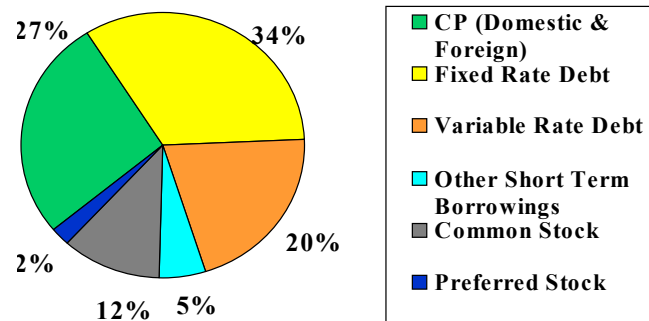

**Lending Portfolio By Industry**  
(**Total Lending Assets of \$18.7 billion in 2000**)

**Breakdown of Revenue from Lending Business**

**Sources of Funds**  
(**Total Sources of \$18.7 billion in 2000**)

# Industry Overview

## • Structure

- ✓ Highly fragmented
- ✓ Underserved by banks
- ✓ Low equipment rental penetration rate in the US (20% vs. 70% in Japan)
- ✓ A large portion of business originates from leasing companies with industrial affiliates\*

## • Trends

- ✓ Consolidation activity slowing
- ✓ Increasing OEM creep into the industry
- ✓ Increasing segmentation
- ✓ Heightened importance of management and credit quality
- ✓ Technology has improved ability to manage risks

## • Performance\*\*

3-yr	High	Low	Average
Sales growth (%)	108.1	-9.2	20.1
Net income growth (%)	28.8	-374.2	14.8
ROE (%)	27.4	-15.9	11.0
ROA (%)	-4.0	3.7	1.3

## • Recession Outlook

- ✓ Rental activity increases during recessions
- ✓ Banks become highly selective, shying away from the middle market
- ✓ Historically, leasing companies have used recessions as a time to expand their businesses
- ✓ Technology improvements will allow companies to respond more quickly, confidently and precisely, thus improving risk management
- ✓ Conclusion: Recession not to be feared

\* See Exhibit 3

\*\* See Exhibit 4

# Why Heller *versus* Other Leasing Companies?\*

- ✓ The best target among Monitor's Top 25 Equipment Finance/Leasing companies
- ✓ High quality management
- ✓ Strong domestic and international brand name
- ✓ Recently implemented growth initiatives have been very successful
- ✓ Accelerating earnings momentum
- ✓ Broad origination platform
- ✓ Stable credit quality

# Stand Alone Valuation Summary

# Sensitivity Analysis\*

(\$ per share)

Note: Sensitivity based on 10% variations of base case.

\* See Exhibit 10

## Heller Integration with UTX

<b>UTX Division</b>	<b>Heller Division</b>	<b>Fit with UTX</b>
 	<b>Special Purpose Property Group</b>	<b>Financing source for real property and equipment</b>
	<b>Aircraft Finance Group</b>	<b>Financing for commercial aircraft and engines through operating leases and loans</b>
 	<b>Global Vendor Finance</b>	<b>Customized sales financing programs in commercial, industrial and information technology markets</b>

# Impact to UTX

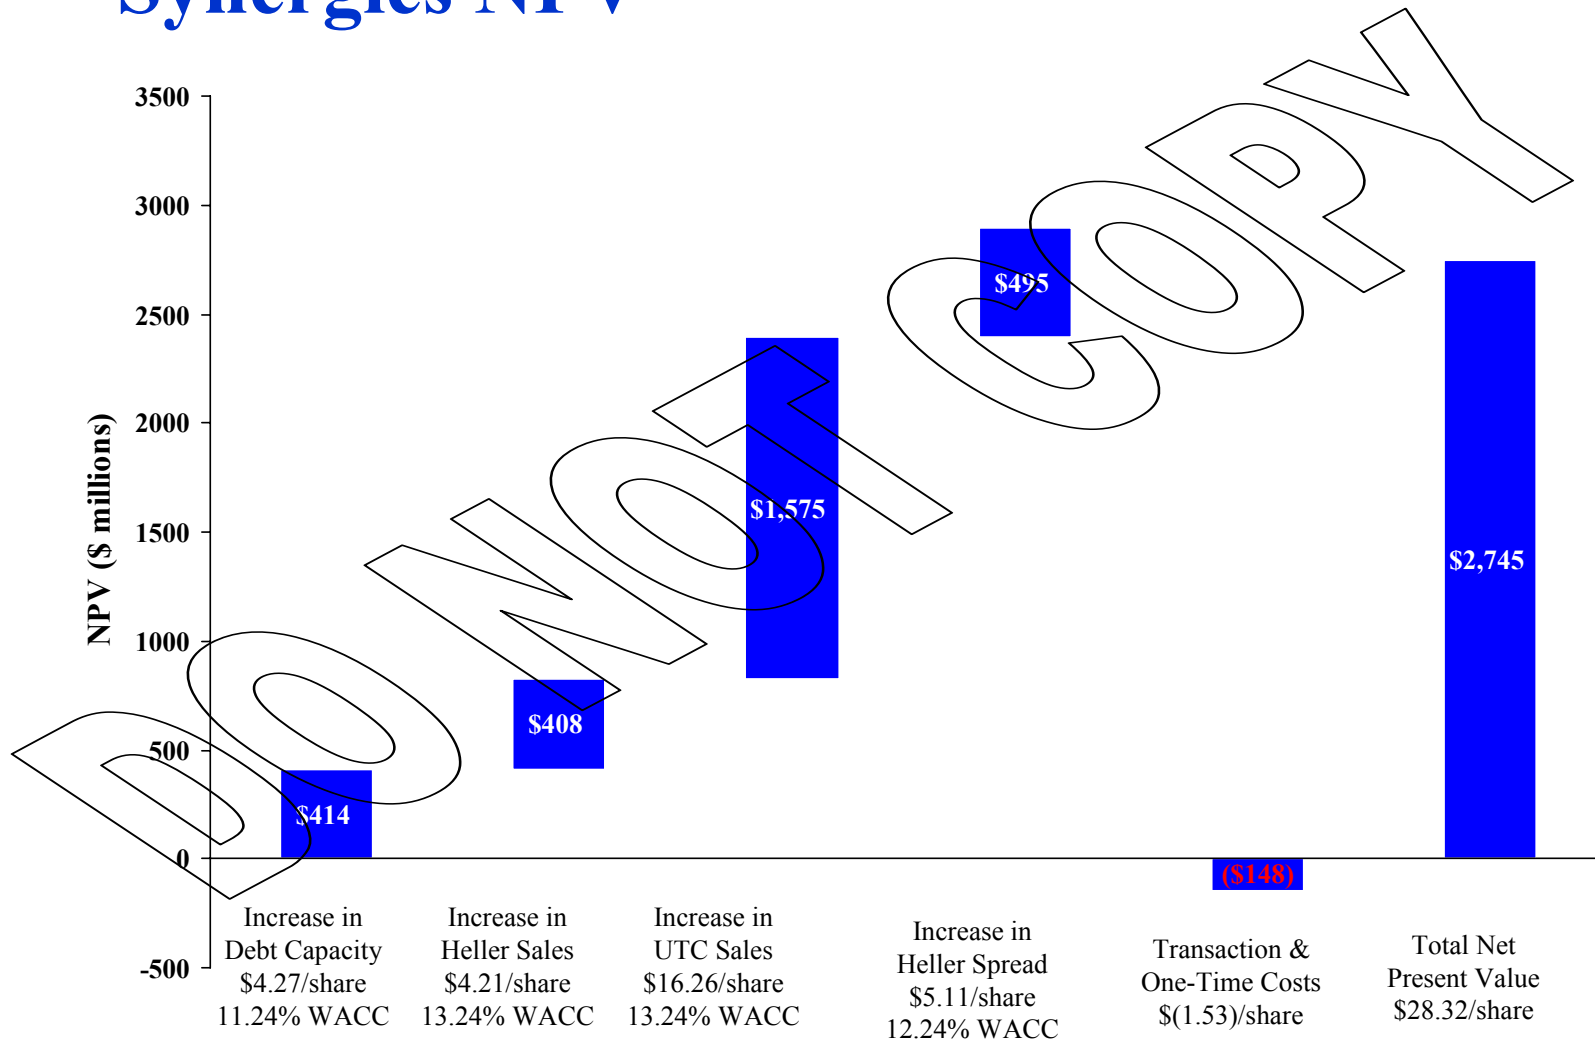

(\$ in millions except per share)

	2002E		2003E		2004E	
	amount increase	% increase	amount increase	% increase	amount increase	% increase
Net Revenue	\$2,003	6.9%	\$3,007	10.2%	\$4,276	13.2%
EBIT	701	17.0%	914	20.1%	1,173	23.4%
Net Income	348	15.1%	633	24.3%	796	27.8%
EPS	\$ 0.63	13.4%	\$ 1.17	21.4%	\$ 1.47	24.5%
Ratio Analysis:						
ROA UTC	8.85%		9.62%		10.17%	
ROA Heller	1.46%		1.44%		1.41%	
ROA Total	4.97%		5.64%		5.90%	
Decrease in ROA (1)	-3.88%		-3.98%		-4.28%	
Debt/Total Cap UTC	30.89%					
Debt/Total Cap Heller	85.79%					
Debt/Total Cap Total	45.46%					
Increase in Debt/Total Capitalization (2)	14.58%					

(1) Financial service firms have very low ROA's which is the reason for the large decrease in UTC's new ROA. The analysts should see through this disparity since they are familiar with GE and GE Capital's impact on ROA.

(2) Change in debt/total capitalization has only been estimated for 2002 because UTC's future capitalization levels are unknown.

# Synergies NPV\*

\* See Exhibits 11&12

Terminal Value is calculated at 8.75X earnings

## Risks

- **Cost depends on stock price up to \$87.12/share**
- **Ability to acquire HF**
  - ✓ Japanese owners have controlling interest
  - ✓ Issue enough shares at right price
  - ✓ Regulatory approvals
- **Integration risk**
  - ✓ UTX is not in the financial services business
  - ✓ Synergies are primarily revenue related
  - ✓ Employees must stay with company
- **Economic and business conditions**
  - ✓ Sensitivity to interest rate conditions
- **Quality of HF's assets\***
- **Ability to maintain UTX's debt rating**

\* See Exhibit 16

## Bidding Strategy

- **Bidding should be bound by the following:**
  - ✓ Upper bound – \$66.50 per share which includes the DCF value for Heller and 100% of anticipated synergies.
  - ✓ Lower bound – \$33.95 current market price per share.
  - ✓ Other considerations – Expected Value Not to Tender (EVNT) of \$43 per share will replace the market price as the lower bound if other bidders are anticipated.\*
- **Heller is rumored to be “in play”**
  - ✓ Current market share price may already contain some acquisition premium.
  - ✓ UTC must bid enough to decisively gain target shareholder approval, thereby reducing the threat of other bidders.
- **We recommend an initial bid of \$50 per share (47% premium)**

\* See Exhibits 14 & 15

# HF/ UTX Exchange Ratio

May 1998 - Current\*

## Accretion/Dilution Analysis\*\*

Note: Accretion ranges correspond to Heller's share price between \$45 and \$65.

\*Dividend accretion estimated assuming dividends of 25% of diluted EPS for UTX and 24% for HF.

UTX voting rights: Existing UTX shareholders will own 90% and 86% of the combined company after paying \$45 and \$65, respectively.

\*\* See Exhibit 13

Date	Firm (Analyst)	Price	2001E EPS	2002E EPS	Price Target	Time Period	Rating	Comments
03/16/01	Raymond James Associates (Michael T. Vinciguerra)	\$33.05	\$3.02	\$3.43	\$42.00	12-month	Buy	<ul style="list-style-type: none"> <li>- HF operates in markets that continue to expand. Analyst believes it can produce double-digit earnings growth, while improving returns on capital.</li> <li>- HF's valuation appears to be in a cyclical trough.</li> <li>- HF positioned in sweet spot of the lending demand curve.</li> </ul>
03/30/01	Lehman Brothers (Bruce W. Harding)	37.00	3.10	3.55	40.00	NA	Strong Buy	<ul style="list-style-type: none"> <li>- HF is contributing to Fuji Bank and analysts does not believe Fuji is actively looking for a buyer. However, HF will be acquired by somebody sooner or later because it is the only large independent commercial lender left; it's market cap is not large enough to attract substantial interest from institutional investors; HF is not a part of Fuji's long-term strategy; and HF should be more valuable over the long-term to potential US strategic buyers than to Fuji.</li> </ul>
01/24/01	ABN-AMRO (Robert P. Napoli)	33.50	3.10	3.55	40.00	12-month	Buy	<ul style="list-style-type: none"> <li>- HF's focus on financing small and midsize companies, a fragmented and growing market, its leadership positions in many segments, strong origination platform, and brand name give it access to several quality loan growth opportunities in the US and international markets.</li> </ul>
01/22/01	Salomon Smith Barney (Sonia Parechianian)	32.00	3.05	NA	36.00	12-month	Buy, High Risk	<ul style="list-style-type: none"> <li>- Overall, trends look very good.</li> <li>- Competitors increasingly pursuing global strategies. HF is already established in Europe.</li> <li>- There is some softness in industries Heller serves and management has been selective in asset growth compared to competitors.</li> <li>- Newer businesses, healthcare, and vendor finance will help HF achieve higher margins.</li> <li>- Challenges include maintaining portfolio diversity, tougher revenue growth comparisons, a possible softening of the economy, and competition.</li> <li>- HF's efficiency ratio reveals excellent cost control.</li> </ul>
01/22/01	UBS Warburg (Alison Williams)	32.00	3.05	3.50	35.00	12-month	Hold	<ul style="list-style-type: none"> <li>- Management has transformed HF into a well-diversified asset-based lender.</li> <li>- HF is protected against interest rate risk and has several protections against a slowing economy.</li> <li>- HF has solid asset quality and overall healthy balance sheet.</li> </ul>

**Exhibit 5: Selected Analyst Commentary (Continued)**

<b>Date</b>	<b>Firm (Analyst)</b>	<b>Price</b>	<b>2001E EPS</b>	<b>2002E EPS</b>	<b>Price Target</b>	<b>Time Period</b>	<b>Rating</b>	<b>Comments</b>
01/19/01	US Bancorp Piper Jaffray (Michael J. Grondahl)	32.25	3.05	NA	35.00	12-month	Buy	- HF has a broad origination platform, diversified low-cost funding sources, and stable credit quality to support 15-17% growth - HF has implemented a program to drive leaner, more efficient business operations.
11/07/00	Deutsche Banc Alex. Brown (Mark C. Alpert)	29.69	3.06	NA	34.00	12-month	Buy	- HF's performance has been recognized in the fixed income markets as its debt was placed on outlook for an upgrade by Moody's (September 27, 2000). Moody's cited strides in improving credit profile, selective underwriting, diversification, and liquidity. The analyst believes that an earnings upgrade could shave 10 bps off of Heller's funding costs.

FOOTNOTES:

- (1) All data compiled from Bloomberg except figures related to FIF, which were compiled from SEC filings.
- (2) Equity Value based on acquisition price for shares.
- (3) Revenues less interest expenses.
- (4) Before non-recurring and extraordinary items (which are tax-effected in the case of recalculating net income).
- (5) Represents common stockholders' equity.
- (6) Market value of equity plus Net Debt. Net Debt is short-term debt plus long-term debt (including capitalized lease obligations and minority interests) and preferred stock, minus cash and marketable securities.

**Exhibit 9a: Discounted Cash Flow Assumptions (Continued)**

	Actual 2000	Projected					
		2001	2002	2003	2004	2005	2006
<b>Capital</b>							
Diluted Shares (millions) (7)	96.9						
Beta (7)	0.94						
Risk free (8)	5.60%						
Market premium	6.00%						
Ke	11.24%						
Terminal growth rate (9)	3.00%						
Preferred stock dividend payout ratio in 2000 (10)	10.00%						

**FOOTNOTES:**

- (1) These business line growth rates are based on projections found in two reports authored by Michael T. Vinciguerra of Raymond James dated March 15, 2000 and March 16, 2001. In these reports, Mr. Vinciguerra projected the following business line growth rates: Commercial Finance +10 to 12%, Leasing Services +15 to 20%, Real Estate Finance +8 to 10%, Small Business +14 to 16% (we changed this rate to 0 and -10% because of the recent announcement that HF will be discontinuing this line of business over the next few years), Healthcare +20 to 25%, and International +10 to 12%.
- (2) Projections are consistent with FY 2000 actual results.
- (3) This is the ratio of total liabilities to equity. Another important ratio is the senior debt to equity ratio (6.07 in 2000). Per several analyst reports (primary source was Raymond James), HF has room to slowly expand its leverage ratio based on the leverage ratios of its peer group. The Raymond James reports referenced in (A) and a CSFB report dated March 15, 2001, state that 6 to 6.5x (senior debt to equity) is a reasonable level of leverage that will not invite a ratings decrease. Our projection of 7x total liabilities to equity is consistent with this notion.
- (4) Per the Raymond James report noted above, an ABN Amro report dated January 24, 2001, and the CSFB report noted above, HF's net interest margin is expected to remain constant going forward. As HF managed to maintain its net interest margin despite Fed rate increases and widening spreads in the commercial paper markets during 2000, we project a small increase in 2001 (3.75 to 3.8).
- (5) Growth rates based on projections in the Raymond James reports noted above.
- (6) Consistent with projections in the ABN Amro and CSFB reports noted above.
- (7) Per Bloomberg.
- (8) Yield on the 30 year Treasury Bond on April 16, 2001.
- (9) Estimate of the long term rate of inflation.
- (10) Recalculated from the FY 2000 10K.

		262	244	228	248	270	295	5,201
<b>Value of equity</b>	<b>\$3,847.65</b>							
<b>Value per share</b>	<b>\$39.71</b>							

FOOTNOTES:

- (1) See the Discounted Cash Flow Assumptions for an explanation of the assumptions underlying this model.
- (2) Net interest income is calculated by multiplying the net interest margin (i.e. spread) by the average funds employed.
- (3) The terminal value is based on a P/E multiple of 8.75. This was derived from the midpoint of the forward P/Es of a group of comparable companies consisting of leasing companies (median P/E of 7.5) and commercial banks (median P/E of 10).

Value of net revenues synergy to HF is calculated by expanding HF's leasing assets by an incremental 20% each year for the next three years. HF's leasing assets will grow due to being able to cross sell its products with UTX's customers.

When Tyco, a competitor of UTX, acquired CIT Group, a competitor of HF, CIT stated that it expected its assets to grow by 10% over the next three years. Since approximately 50% of CIT's business is equipment leasing, this would represent a 20% growth rate in its leasing assets.

This growth in HF's assets represents the following as a percentage of assets, net revenues and net income:

	2002	2003	2004	2005	2006
Incremental Growth in Assets	\$1,214	\$3,125	\$6,049	\$7,077	\$8,280
HF's Assets	23,493.35	26,374.90	29,715.05	33,584.18	38,065.23
Percent of Assets	5.17%	11.85%	20.36%	21.07%	21.75%
Incremental Growth in Net Revenues*	\$22	\$77	\$163	\$234	\$274
HF's Revenues	1,273.10	1,409.63	1,565.48	1,743.39	1,946.58
Percent of net Revenues	1.70%	5.48%	10.44%	13.41%	14.05%
Incremental Growth in Net Income	\$5	\$18	\$38	\$54	\$63
HF's Net Income	370.74	408.99	452.37	501.58	557.45
Percent of Net Income	1.35%	4.37%	8.35%	10.78%	11.35%

\* net interest spread applied to incremental growth in assets

Value of net revenues synergy to UTX: Analysts have reported that UTX is currently losing sales because it cannot provide adequate financing to its customers. We assume that with the acquisition of HF, UTX will be able to serve customers it previously lost due to the lack of financing. We have calculated the additional sales to UTX by taking a decreasing percentage of HF's incremental assets.

UTX's profit margin and net income margin was estimated based on JP Morgan's analyst report dated 1/26/01.

This growth in UTX's sales represents the following as a percentage of net revenues and net income:

	<u>2002</u>	<u>2003</u>	<u>2004</u>	<u>2005</u>	<u>2006</u>
Incremental Growth in Net Revenues	\$606.97	\$1,406.11	\$2,419.53	\$2,476.99	\$2,484.07

Terminal Value					563.76			
Total Net Impact to HF	\$40.02	\$44.84	\$50.44	\$56.92	\$628.19	\$495.44	\$5.11	12.24%

Value of increase in margins is calculated by comparing what a higher rated financial services company borrows as compared to what HF currently borrows at. UTX has a higher debt rating than HF which should help raise HF's debt rating. In addition, there currently may be a discount in HF's ratings since it is primarily owned by a Japanese bank. The rating agencies may view a strong US company as a better backing for HF.

The difference in the ratings represent .48 to .59 percent spread. The incremental revenues for HF is based on the conservative .48% spread over the entire life of the model.

This increase in HF's margin represents the following as a percentage of net revenues and net income:

	<u>2002</u>	<u>2003</u>	<u>2004</u>	<u>2005</u>	<u>2006</u>
Incremental Growth in Net Revenues	\$101.47	\$113.70	\$127.89	\$144.32	\$163.36
UTX's Revenues	1,273.10	1,409.63	1,565.48	1,743.39	1,946.58
Percent of Net Revenues	7.97%	8.07%	8.17%	8.28%	8.39%
Incremental Growth in Net Income	\$40.02	\$44.84	\$50.44	\$56.92	\$64.43
HF's Net Income	370.74	408.99	452.37	501.58	557.45
Percent of Net Income	10.79%	10.96%	11.15%	11.35%	11.56%

Net Income Impact to UTX	\$32.36	\$36.37	\$40.87	\$45.94	\$503.37	\$413.68	\$4.27	11.24%

Per UTX's financial statements, it currently finances some equipment purchases from its customers. There is a significant difference between UTX's and HF's leverage such that HF can provide the leases at a lower capital cost to the company.

This calculation takes the leases at the end of 2000 per UTX's financial statements, grows them by approximately 12% a year (JP Morgan analyst estimate) to estimate the amount of leasing UTX would do without HF. The difference in borrowing costs is calculated as the difference between UTX's cost of capital (per Bloomberg) and HF's cost of capital (per Bloomberg).

This increase in UTX's net income represents the following as a percentage of net income:

	2002	2003	2004	2005	2006
Incremental Growth in Net Income	\$32.36	\$36.37	\$40.87	\$45.94	\$51.63

FOOTNOTES:

(1) This shows that HF has excess liquidity to handle being shut out of the capital markets for 12 months. In addition, UTX can limit its financing requirements of HF by developing a Keep Well Agreement. Currently HF has a Keep Well Agreement with Fuji Bank. The agreement stipulates that if HF should lack cash or credit facilities to meet its commercial paper obligations, then Fuji Bank will lend HF up to \$500M. The loan is payable on demand. In addition, the Keep Well Agreement provides that Fuji maintain HF's stockholders' equity at \$500 million. Fuji has never had to pay under this agreement and receives an annual commitment fee of approximately \$1 million per year in exchange for the agreement. The Keep Well does not expire until 2007 and prevents Fuji from relinquishing more than 50% voting control.

**GE Capital to Expand Commercial Business By Buying Heller Financial for \$5.3 Billion**

By **NIKHIL DEOGUN** and **MATT MURRAY**  
 Staff Reporters of THE WALL STREET JOURNAL

[General Electric Co.](#)'s GE Capital unit, seeking to expand its sizable commercial-finance operations, agreed to acquire [Heller Financial Inc.](#) for about \$5.3 billion.

The announcement was made Monday. Japan's [Fuji Bank Ltd.](#), which owns 52% of Heller's equity and controls 77% of the voting stock, has endorsed the transaction.

GE is offering \$53.75 a share, representing a substantial 50% premium to Heller's trading price Friday of \$35.90, down 25 cents, at 4 p.m. in composite trading on the New York Stock Exchange, and well above Heller's 52-week-high, reached July 3, of \$40.78. Also in Big Board trading Friday, GE shares were up 90 cents to \$44.65.

GE Capital is based in Stamford, Conn., and Heller Financial is based in Chicago. Buying Heller is likely to be viewed as a nice consolation for GE Capital, which earlier this year failed to entice the executives of CIT Group Inc. and the creditors of Finova Group Inc. into selling to GE. Both companies ended up in the arms of competitors.
