Mission 2 Grading Form

Total: 70 marks

Breakdown of Marks:

1. Rationale Document (40 marks total)
    1.1. Formatting and organization – 5 marks
    1.2. Clarity and conciseness of rationale – 10 marks
        1.2.1. The rationale should explain what aspects of the interface were implemented, and why the design is being constructed the way it is.
    1.3. Survey is included – 5 marks
    1.4. Survey questions – 10 marks
        1.4.1. The questions should be direct, well-formed, and relevant to improving the product. Questions demonstrate understanding of requirements, or attempt to resolve an ambiguity.
    1.5. Description of prototype functionality and contents (clear, and well-organized) – 10 marks
2. Source code (30 marks total)
    2.1. Marks are awarded for including functional source code and a README file. These marks are given in recognition of the time and effort involved in implementing a prototype. The code doesn't have to be pretty or well documented, so long as it runs.
