

Mission 1 Peer Evaluation

In order to succeed in the project portion of this course, all of your team members will need to contribute to the project. The purpose of this peer evaluation is to begin to assess your own contribution to the project as well as your team members contributions. This assignment should only take a few minutes to complete. The scores and comments you enter will remain confidential between you and the instructor.

Submit a document containing the following information:

- **Basic information:** Your name, ID number, project group number, and project title
- **Self assessment:** Briefly summarize your own contribution to Mission 1. Take into account the quality and quantity of your contribution.
- **Peer assessment:** Rate the contribution of each of the other members of your group between 0 and 10, with 0 being no contribution and 10 being the most substantial contribution. Do not assign yourself a score in this section. You may also include written comments to explain your scores. In particular, if you assigned one team member an exceptionally high or exceptionally low score relative to the others, please explain why. Also, if one team member did less or more work on this assignment, but you agreed to this in advance (e.g., maybe you agreed that they will contribute more to future missions) then please be sure to include a note about this. These scores and comments will remain confidential between you and the instructor.
